

AFTCO Goldfinger Outrigger Release Clip

The OC-1 Outrigger release clip should be attached directly to the outrigger halyard with-out the use of swivels.

The adjustment-slider end of the clip needs to be up towards the tip of the outrigger.

For fixed position bait trolling, the fishing line should be twisted 5 to 10 times before hooking loop over the OC-1 bail.

The line may also be passed over the bail without twists to allow for adjustment of baits or lures.

Suits all types of outriggers.

Price: \$34.95
