

Swallowtail. Deadly Yellowfin, Bluefin & Albacore Lure

In the 80's and 90's the Swallowtail was a super successful tuna lure that took more than its fair share of Yellowfin and Bluefin Tuna.

They are a strange looking design, definately not a winner in the looks catergory but damn these things catch tuna!

They are approx 8 inches in length

Run one of these badboys past a few tuna and you'll need to be ready for the screaming ratchet!
