

Pakula Hornet Jet- Paua. 8.5" Short Rigger / Short Corner

The Pakula Hornet with its stubby profile and shape gives it great stability in all trolling conditions. They are particularly effective in very rough and windy conditions where the extra drag created holds the lures in position lessening worries about the lures blowing out and tangling.

This lure is a must have when trolling for Marlin, Tuna and Mahi Mahi.

Length 8.5" / 212mm
