

Rod Riggers / Outriggers. Stainless. Set of 2

Set of 2 Stainless Steel Outrigger / Rod Riggers with lanyards.

These heavy-duty all Stainless steel removable rod riggers allow you to point the rod to any side of the boat when trolling. Just insert the rod rigger into any flush-mount rod holder and you're ready to troll.

They are able to be locked in various positions allowing you to get almost the same spread as you would using outriggers, without the huge cost. Best suited to rod holders that are upright or angled towards the back of the boat.

We recommend the use of lanyards or safety lines when using rod riggers.

Price: \$109.95
