

Shark Rig, 13/0 Hook with 435lb Coated wire

Shark Rig.

This Shark rig is made from 2m of stainless steel 435lb, 316ss Nylon coated wire and a 13/0 stainless circle hook.

The perfect rig for chasing big sharks. The first 20cm of the rig is doubled and twisted to double the resistance to bit offs. We also attach a 4/0 Crane swivel to eliminate twist when retrieving baits and winding in beasts.

2m in length. If you need a different length please email us, we're happy to custom make rigs.

We offer various sized rigs from small ones like this to rigs made with 24/0 circles or monster 15/0 4480 J Hooks. Popular baits for these rigs include Eels, Rays, Mullet and various other fish baits depending on whats available.

Peak shark fishing is generally at dawn and dusk however they can be caught all day depending on the location. In QLD shore based shark fishing has taken off as there are some real monsters available, even around populated areas like the Gold Coast.

The [Queensland Fisheries](#) have information available at the attached link regarding shark fishing. Please make sure you check your local regulations regarding shark fishing as it varies in different states.

NSW Fisheries also provide research tags free of charge to game fisherman. We sell [tagpoles](#) for use with these tags.

Thomas's tips - If you're new to shark fishing try starting small. Sharks can be a real handful when they get over 50kg and cause substantial damage to boats and gear. A good start would be fishing in the river with a small fish bait. Get to understand shark behaviour and their power before you try and land a monster.
