

Outrigger Kit. 3.5m. Fits in rod holders. Full Kit

Outrigger Kit. 3.5m Outriggers with Rigging Kit - Rod Holder Mounts.

by Henderson Australia

This complete Outrigger Kit 3.5m Includes:

- 2 x Bent butt Stainless steel Bases, designed to fit straight into your existing rod holders
- 2 x 2pc Black Fibreglass Outrigger Poles. 3.5m total length.
- Rigging Kit with Release clips, Black Mono rigging line, crimps, swivels, eye straps, stoppers & snubbers. Please note rigging kit may vary depending on availability.
- 4 x 316 Stainless Steel Eye Bolts

The stainless steel bent butt outrigger Bases are designed to slip straight into your existing rod holders. No holes needed or extra bases so they're very easy to pack away or take with you to another boat. The only permanent fixture is two small pad eyes used to attach the snubber cords. We recommend that you only use these outriggers in Heavy Duty rod holders as cheaper plastic and spot welded rod holders will not handle the pressure.

All parts come with a 12month Australian Warranty.

This Outrigger Kit. 3.5m Outriggers come unriggered. Diagrams provided with each set of outriggers and pictures of rigging also available. Customers are also welcome to call or email for any help required.

PLEASE NOTE THIS PRODUCT ONLY AVAILABLE TO AUSTRALIAN CUSTOMERS. Remote areas may attract extra courier costs, please email for quote if unsure of your location.
