Dumbell Pop 110. HOT NEW COLOUR! GTs, Spanish, Tuna!

King of the poppers, the dumbell is the most exciting range of surface bloopers to hit our market, fish with one and you will know why. Weighted with casting distance in mind, the popper is constructed with hardwood / hard plastic, achieving excellent buoyancy and as a big fish popper it is fitted with VMC trebles and extra heavy duty split rings.

The Dumbell Pop sits vertically in the water and with a slight flick of the rod tip, the popper serges forward allowing its huge concaved head to spray a large volume of water forward resulting in a very loud bloop noise.

Length 110mm
