9" Tornado Lure. Deadly on Tuna & Mahi

This Tornado Lure is a deadly tuna trolling lure, but is also just as good in a light tackle spread for small black marlin & Mahi.

They are 9 inches long and have a weighted, long pusher style head. I'd run it as a long corner or long rigger lure however it's versatile shape will allow it to be used in basically any position.

Tornado Lures are handmade in Victoria Australia and are some of the highest quality lures available.

Rigging options available below or also available unrigged.

Length 9 inches

Weight

0.15kg
