

Deep Drop - Light Squid. The ultimate deep water lure

Deep water fishing off the shelf just got more interesting.

Fish that are 400m down are big, angry and territorial. If they think it's possibly dinner they'll smash it. So with that in mind here's something they simply won't resist.

A 9" Rubber squid rigged with a snap swivel so it's fast to attach and detach from your rig. At the rear is a 10/0 ultra sharp Razorpoint hook.

The key however to this rig is the water activated light located inside the squid. It pulses and flashes different colours to attract and lure them into striking. Old blue eye won't be able to resist.

Price: \$19.95
