

## Pakula Witchdoctor - Game fishing teaser

### **Pakula Witchdoctor. The Real Original 100% made in Australia Pakula Witchdoctor Teaser**

The Pakula Witchdoctor Teaser was Peter Pakula's first invention. Initially designed for use while trolling live and dead baits. After all these years the Witchdoctor is now accepted as the best fish exciter for all game fishing trolling applications. At all trolling speeds this teaser stays deep below the prop wash. It sends out irresistible vibrations, flashing reflected shafts of fluorescent blue and purple light in all directions. Unlike any other teaser, it never comes to the surface to interfere and tangle with trolling lines.

**The Aussie made Witchdoctors are wood with two pack paint, perspex mirror which is waterproofed. These should be washed after each use and dried in the shade. Do not put this product with Mirrors in bags until they are dry which can take quite a while. Best to wrap them in an old towel or dishcloth that breathes.**

Also available are Witchdoctor [carry bags](#) and [towropes](#).

#### FEATURES AND SPECIFICATIONS

- Witchdoctors are Made in Australia
